

Non-Potable Water Advisory

This Notice applies to residents and users connected to the raw water line supplying the Resort Village of Beaver Flat.

This advisory is issued due to the residents supplied with untreated raw water from the Resort Village of Beaver Flat water line that supplies the irrigation to the Resort Village. Since this water has not undergone filtration or disinfection the safety of this water will not be guaranteed due to the possibility of high turbidity levels. The Resort Village of Beaver Flat is reminding all owners of service connections to this line to:

- Use an alternative water source for personal consumption
- This line is for **irrigation only** and is not to be connected in anyway to a residence

There is no chlorine present in the water to kill pathogens in the water.
